

Core Facility Flow Cytometry Publication Guidelines

(acknowledgement versus co-authorship)

autonomous use of instruments		analysis or sorting services		data analysis	
training of users to acquire flow data / sort autonomously incl. general advice on the application	(re)design of staining panel, protocol, controls, experimental conditions, gating approach etc.	routine data acquisition or sorting services incl. general advice	(re)design of staining panel, protocol, controls, experimental conditions etc.	as necessary for reporting (as part of service), transfer of raw data, and general advice	constructive data analysis and/or data interpretation or corrections thereof
acknowledgement* of the facility	co-authorship# for involved staff	acknowledgement* of the facility	co-authorship# for involved staff	acknowledgement* of the facility	co-authorship# for involved staff

* example text: ‘We acknowledge the Core Facility Flow Cytometry at the Biomedical Center, Ludwig-Maximilians-Universität München, for *providing equipment / services / expertise / assistance with data analysis.*’ (use all that apply)

affiliation: Biomedical Center (BMC), Core Facility Flow Cytometry, Faculty of Medicine, LMU Munich

Just like all other co-authors, we are entitled to proofread/contribute to the manuscript! It should be in everyone’s interests that flow cytometric data are represented appropriately, and that instruments & methods are described correctly.

We are happy to contribute the final figures, data, and/or methods section to ensure the accuracy and reproducibility of data.
